

THERMAL DESORPTION

Optimization of Analysis Parameters

Do you work daily with GC coupled to thermal desorption and want to push the limits of your analytical capacity?
This training is specially designed for experienced analysts and laboratory technicians who want to deepen their knowledge further.

Course Content

- **In-depth theory: principles of thermal desorption**
- **Hardware fine-tuning: temperature and flow**
- **Sample-specific strategies: choices in sampling**
- **Parameter optimization: sorbent selection, water management**
- **Troubleshooting: systematic diagnosis and interventions**
- **Hands-on sessions**

Course location

IS-X Belgium Avenue Jean-Etienne Lenoir 2, 1348 Louvain-la-Neuve

7 – 8 October 2025

Brand independent

2 day course

€ 1825,- / participant
